## BAKING PAPER JUMBO ROLL

Food-grade silicone coated on both sides or single-side. It is made from 100% virgin wood pulp. It has excellent smoothness, constant uniformity, transparency and great intensity. Our baking paper is greaseproof waterproof non-stick and heat resistant. Our baking paper can resist very high temperatures up to 230°C(450°F) as it is processed by a special technique. It is the ideal paper for baking and cooking at home and out of doors. All the sizes, printing and packaging can be done according to the customer's request.

BAKING PAPER JUMBO ROLL

# PARCHMENT PAPER SHEET

## PARCHMENT PAPER SHEET

Made of virgin wood pulp & double side silicone coating in food grade. Self-bakery household baking paper, using virgin wood pulp and extracting vegetable essence of silicone oil, making wood pulp and silicone oil fully integrated which increases paper flexibility. Paper is odorless and available for baking, grilling and retaining freshness in the fridge and so on. Baking bread, cake and cookies, etc. Directly put the ready material on the silicone-coated baking paper of the bakeware. Finished items will be in good shape, nonstick and easy to lift out, easy to clean for bakeware. No need to brush grease on the paper when baking chicken wings or other meats. No oil penetration onto the bakeware during the process of baking meats. Custom sizes, lengths and packages are available.

# BAKING PAPER ROLL

Applied with imported paper made of virgin wood pulp, after treatment with double side food grade organic silicone oil. Nonstick, waterproof, greaseproof, high-temperature resistance, durable for roasting & more durable. Paper is colorless, odorless and fluorescence-free. In conformity with GB4806.8-2016, China's standard of food safety test. In accordance with FDA food safety standards. Applicable to oven, microwave oven, induction cooker. Varieties of sizes for option, or customized based on tool shape and size.

# AIR FRYER PAPER LINER

## AIR FRYER PAPER LINER

Our air fryer paper liner is made from 100% virgin wood pulp. They are grease-proof, water-proof, non-stick, anti-scorch. Our air fryer paper liner with plant silicone oil has a very high density and it is high temperature resistant up to 230 °C (450 °F). Both sides of our air fryer paper can be used because they are silicone coated both sides. There are two colors of air fryer liner - white colors and natural colors. We have two shapes of air fryer liner - round and square. For round one, we can produce 160mm\*45mm, 200mm\*45mm etc. For square one, we can produce 160mm\*45mm, 200mm\*45mm etc. Besides, sizes of our air fryer liner are customized. What's more, OEM and ODM is available.

# GREASEPROOF PAPER

Grease-proof paper is mainly used for packaging greasy food. It is required that grease cannot penetrate from one side of the paper to the other within a certain period of time. The oil-proof level is generally 0-3, which can be used for packaging lighter foods such as sandwiches; the oil-proof level is 4-6, mainly used for burgers, French fries, etc.; the oil-proof level is 7-10, which can be used for packaging For fast food with oily properties such as fried chicken, the vegetable oil will not seep or stick after dripping onto the paper surface. Greaseproof paper also has good printing performance and is mainly used in the production of high-end food bags. Food bags made of greaseproof paper have long been widely used by world-famous fast food chain companies such as KFC and McDonald's. In addition, grade 10 greaseproof paper can also be printed as Use of outer paper for popcorn bags.

# GREASEPROOF PAPER

# SANDWICH PAPER

Sandwich paper is made of 100% virgin wood pulp. A protective barrier on the paper prevents grease from soaking through it. It generally is produced in sheets or rolls. Sandwich paper is used for wrapping foods for storage, especially greasy foods such as butter, bacon or doughnuts, burgers etc.

# SANDWICH PAPER

# WAX PAPER

Wax paper is paper that has been coated with food-grade wax to make it both nonstick and moisture-resistant. It is not heat-resistant—even low heats can melt the wax—so it is not suitable for lining pans the way parchment paper can. It made of 100% virgin wood pulp, double/single-side wax coating available. It suit for wrapping butter, bacon or doughnuts,burgers,sandwiches etc.

## ALUMINUM FOIL ROLL

Household aluminum foil rolls can be used in cooking, freezing, freshness and baking. In the refrigerator or freezer, food packed with aluminum foil can hold its shape, avoid water loss from fish meat, fruit and vegetable, and prevent the dissemination of taste. Our product conforms to FDA authentication. All the sizes and packaging can be done according to the customer's request.
